Punjab, India.

OBJECTIVE STATEMENT

Skilled in full-stack web development and UI/UX design, with expertise in Python, Java, JavaScript, React, and CSS. Experienced in building dynamic, responsive websites and applications, focusing on user-centric design, backend integration, and performance optimization. Passionate about creating seamless user experiences through thoughtful UI/UX design and solving complex technical challenges while ensuring scalability and maintainability.

EDUCATION

- **Bachelor of Technology in Computer Science and Engineering**   *2022-26*
  Lovely Professional University, Punjab   CGPA: 7.60/10

PROJECTS

- **Recipe Blog Website**   *June. 2024 - July. 2024*
  Remote   Github
  - Developed a full-stack recipe blog website using the MERN stack, enabling users to create, read, update, and delete (CRUD) recipes seamlessly.
  - Designed ensuring smooth navigation and an engaging user experience.

- **MyShowz**   *Aug. 2024 - Oct. 2024*
  Remote   Website
  - Developed MyShowz, a movie ticket booking website with an interactive graphical theater seat selection using JavaScript, jQuery, and React.
  - Implemented dynamic seat selection with real-time availability updates for a seamless booking experience.

- **Get-Apartments**   *Oct. 2023 - Oct. 2023*
  Remote   Website
  - Developed a responsive and feature-rich real estate website using React, Next.js, and Chakra UI, showcasing modern web application design.
  - Integrated Rapid API to fetch dynamic property listings, allowing users to explore rental properties with detailed information, pricing, and reviews.

EXPERIENCE

- **App Development**   *September 2024*
  Anndata (Smart India Hackathon)
  - Developed an intuitive and user-friendly mobile application using React Native, ensuring a seamless experience for both farmers and customers.
  - Designed and implemented engaging UI/UX, focusing on accessibility and ease of navigation to enhance user interaction.
  - Optimized performance and responsiveness, ensuring smooth functionality across various devices and platforms.

- **Hackathon Judging**   *September 2024*
  Hackathon Judge (Sophomore Hackathon)
  - Evaluated student projects focused on frontend development using React Native, React, and Tailwind CSS, providing constructive feedback and scoring based on innovation and execution.
  - Enhanced my understanding of the judging process and developed an appreciation for the importance of user experience and design in successful web projects.Certificate

SKILLS

- **Programming Languages**: Python, C, C++, Java, JavaScript, HTML, CSS (Cascading Style Sheets)
- **Web Technologies**: Frontend: HTML, CSS, JavaScript, TypeScript, React.js, Bootstrap, Tailwind CSS
- **Relevant Coursework**: Data Structures & Algorithms, Operating Systems, Object-Oriented Programming (OOP), Database Management Systems (DBMS)
- **Languages**: Hindi(First Language), English

CERTIFICATIONS

- **Full-Stack Development using MERN Stack | By Cipher School**: Completed a 6-week MERN Stack Development course at Cipher School, focusing on MongoDB, Express.js, React.js, and Node.js (June 2024 - July 2024). Achievements include Project Completion Certificate and Declaration Letter. Certificate
- **Mastering Data Structures & Algorithms using C and C++ (Udemy)**: Completed a comprehensive course on data structures and algorithms, enhancing problem-solving and programming skills (Aug 2024). Certificate
